We are also pleased to share an update on the HOA's electrical safety project, which began in 2013. The project is now 97.4% complete, with only 2 units remaining. Both units are scheduled for completion in September, bringing this important, long term Association project to a successful conclusion.

Additionally, Gary recently installed new building and unit signage throughout the complex. The improved signage offers clearer visual direction for emergency service personnel, as well as for homeowners, family members, and guests.

The latest Quarterly Manager's Report is also now available on the HOA website and includes additional information regarding recent maintenance, improvements, and Association projects. A direct link to the report is provided below.
